

# Christian Lievrouw

Full-stack software developer

(641) 220-1703

celievrouw1@gmail.com

## PROJECTS

**Geoproject** – | <https://github.com/ArikMackenburg/geoproject>

Code 201 final project – Languages used: HTML, CSS, Javascript

Pulled data from an embedded JSON file to render information for healthcare providers to compare themselves to the digital marketing efforts of other healthcare providers.

**COVID Watcher** – | <https://github.com/covidwatcher/covidwatcher>

Code 301 final project – Languages used: HTML, CSS, Javascript, SQL, EJS

This is a dynamic front end and backend application that pulls from a third party API. The user is able to save data from the API in a SQL database for easy access through the server-side rendered front end.

**Gathering** – | <https://github.com/Gathering401/Gathering-Backend>

Code 401 Midterm – Language and Framework used: C#, .NET

An API and database backend to provide the ability for users to perform CRUD actions for event planning. Users are able to create an account, create events, and add people to the events.

## EDUCATION

**DeltaV Code School**, Cedar Rapids, IA

2020 – Current

Full-stack developer training while practicing agile software development practices

**Hawkeye Community College**, Mason City, IA

2013 – 2014

Classes on HTML and CSS

## EXPERIENCE

**Kabrick Dist**, Mason City, IA – *Driver*

May 2015 – May 2020

Optimized delivery routes through customer prioritization and distance estimations each day. Maintained truck inventory throughout the day to ensure accurate deliveries.

**Martin Brower**, Mason City, IA – *Driver*

August 2018 – February 2019

Collaborated with dispatchers and customers to ensure timely deliveries.

## TECHNICAL SKILLS

Javascript

HTML5

CSS3

EJS

SQL

C#

.NET

## SKILLS

Planning

Prioritizing

Communication

Teamwork

Pair-programming

Debugging

## TOOLS

GitHub

Visual Studio/ Code

Heroku

Azure

.Net Core
